

Don't Overpay for Healthcare

HealthComp is here for all your health benefits needs. Your health plan includes **FREE** access to the Emergency Room Solutions Program.

Visiting an urgent care facility over an emergency room can save you time and money. Urgent care centers are equipped to handle a wide range of non-life-threatening medical conditions, such as minor injuries, infections, and illnesses in a timely and cost-effective manner. Unlike emergency rooms, which prioritize critical cases, urgent care clinics offer shorter wait times, often with the convenience of walk-in appointments.

This free program offers help locating in-network primary care providers and urgent care facilities.
